Back Up Your Birth Control - Sample Petition

Today women have a second chance to prevent unintended pregnancy with emergency contraception. It's a safe and effective method, if taken a few days after sex. But for EC to work, women need to know about it, and be able to get it in time. Support making Plan B, the EC product on the market, readily available for women to prevent an unintended pregnancy.

Please add your name to the petition below if you agree that women should have greater access to emergency contraception.
